PROJECTS

GirlScript SoC Official Website

Production grade responsive & SEO-friendly website for GS Foundation

- A web based application developed using Next.js & TailwindCSS Frameworks intended for the 8000+ contributors participating in the annually organized opensource program.
- Was indispensable in showcasing the impact & commitment of the program across student communities during the sponsor pitches & conforms to their guidelines.
- Was developed using Agile methodologies & CI/CD pipeline, prototyped in Figma, built with NextJS, TailwindCSS, ChakraUI & a plethora of npm libraries, hosted in Vercel, includes a dynamically updating paginated leaderboard & on-chain certificate verification.

DeStackOverflow

Web3.0 version of the most popular public forum for developers: Stack Overflow

React - Avalanche - IPFS - Moralis - Solidity

- Decentralized Data** - The metadata of each post gets stored in IPFS and then is stored on Avalanche Blockchain.
- Karma & Donation** - Users can donate crypto to the answers they like. This incentivizes the upvoting system & hence rewards the helpers for their efforts in solving doubts on the platform.
- Privacy & Free for All** - Wallet is an individual's identity and no restrictions of any kind as the complete website is handled by a smart contract.
- Won Hackathon QuiSWE Datafest 2022 - Blockchain Track
- Received microgrant of 5000\$ from IPFS/Filecoin Foundations

NFT Haven

DApp serving for NFT-generation, minting & trading

Moralis - Chainlink - Web3.js - React - Node.js

- A multichain Defi Dashboard which allows minting & tracking of assets on multiple chains and creation of personal NFTs on Polygon with a friendly UI.
- Soulbound Token NFT Minter - Any digital asset important to an individual (eg, Certificates, Important Documents) can be attached to wallet forever
- Lightning NFT Network - Mint NFTs in blazing speed across multiple ecosystems (Ethereum, Binance Smart Chain, Polygon) & gift them to friends/loved ones.
