PROFESSIONAL EXPERIENCE

Advanced Application Engineering Sr. Analyst | Accenture **Kolkata, India | Sept 2023 – Present**
Client: Fortune 50 media & entertainment company | Java, Spring Boot, Apache POI, JavaScript, MariaDB, Elasticsearch

- Designed and built Spring Boot microservices for a licensing revenue-forecasting portal, integrating Workday Adaptive, AWS S3 and MuleSoft to fix cold-cache issues; tuned Elasticsearch to cut P95 latency by 30%.
- Built a hybrid UI + API MCP server for Workday Adaptive Planning that automates and standardizes deployments across staging and production environments.
- Pruned redundant Cartesian row combinations with a Trie, shrinking S3 payloads so downstream systems could process a once-infeasible template; separately cut download time 120× & scaled multithreaded uploads 3.5K→80K+ rows.
- Single-handedly architected an Apache POI engine generating 4 Excel data-entry templates with real-time, multi-layered validation, cutting manual handling time by 50% and data-entry errors by 80%.
- Averted missed financial-close deadlines during a production outage by shipping a resubmission path straight to the MuleSoft integration layer; cleared for production the same day and now a critical service endpoint.

SKILLS

Languages: Java 17+ (primary), JavaScript/TypeScript, Python, SQL, C++
Backend: Spring Boot, Spring Security, Hibernate/JPA, REST/SOAP APIs, Microservices, FastAPI, Node.js, Bun
Frontend & Data: Next.js, React, Redux, Tailwind, Material UI; PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch
AI: Agentic AI, multi-agent systems, LLMs, MCP & tool calling, RAG & embeddings (pgvector), prompt engineering, LLM evaluation, guardrails, LangChain, LangGraph, CrewAI, Amazon Bedrock
Cloud & DevOps: AWS (Lambda, ECS/ECR, EC2, S3, CloudWatch), Docker, Git, Linux, CI/CD
Testing & Tools: JUnit, Mockito, Jest, Playwright, Postman, Jira, Agile/Scrum, GitHub Copilot, Cursor, Claude Code

PROJECTS

Monoma — Agentic AI Company Brain **usemonoma.com**

- Built a multi-tenant agentic AI platform that unifies Jira, Confluence, GitHub and Slack (tickets, docs, PRs, discussions) into a persistent organizational graph, using FastAPI, Celery, PostgreSQL/pgvector, Redis and MCP.
- Developed 18+ permission-aware MCP tools and workflows with approval gates, tenant-scoped access and audit trails, powering topic monitors, digests, morning briefs, blocker detection and cross-tool investigations.

SettleX — Cross-chain Clearing & Settlement Layer **mvp.settlex.fi**

- Architected a chain-agnostic cross-chain settlement protocol that aggregates transactions and net-settles deltas instead of bridging individually, reducing transaction fees by up to 90% while improving capital efficiency.
- Built and deployed a containerized Bun/Elysia backend on AWS with scheduled workers, WebSocket listeners and PostgreSQL to monitor spoke-chain contracts and execute settlements, plus a Next.js testnet explorer.

EDUCATION

B.Tech in Computer Science & Engineering | University of Calcutta **2019 – 2023**

- CGPA: 9.24/10.0 (Transcript) | Coursework: Data Structures & Algorithms, OOP & Design Patterns, AI, DBMS, OS

LEADERSHIP EXPERIENCE

Core Organizing Team | Web3Conf India 2023 **Goa | Jun 2023 – Aug 2023**

- Led sponsor outreach, forging partnerships with blockchain startups & Web3 gaming platforms; directed volunteers, event tech & the event app to streamline registrations.
- Hosted a conference stage & moderated a panel of speakers; ran on-site logistics with event staff & venue teams.

Program Manager | GirlScript Summer of Code 2022 **Jan 2022 – Aug 2022**

- Recruited & led a 30-member team to run a 3-month global open-source program (6,000+ contributors, 14+ countries); secured $10K+ in sponsorships via 10+ partner organizations.
- Directed the program's end-to-end workflow & shipped the official Next.js site with GitHub Octokit leaderboards & blockchain-verified certificates, simplifying registrations by 30%.

ACHIEVEMENTS

- Anthropic Certifications: Claude Certified Architect – Professional; Claude Certified Developer – Foundations (2026).
- Winner, Team OpenSorcerers: 12+ Web 3.0 hackathon wins incl. Axelar Infinity Quest ’25, EthGlobal Circuit Breaker ’24, Web3Conf India ’23, QuiSWE Datafest ’22 ($5K IPFS microgrant), Chainlink Fall ’21 & Hack36 ’21.
- Competitive Programming Lead, CodeChef Chapter, UCSTA; Regional Finalist, Hult Prize ’21 (Mumbai Summit).
